High Profit Industry

Strong average global growth >4%
Week Rand/\$ > 8.00

Weak Coal Demand

- Energy alternatives commercially viable – decrease fossil fuel demand
- Environmental pressures decrease coal use
- Low economic growth decrease demand

SACEA Coal Industry Scenarios (draft)

High Demand for Coal

Scenario 2: "Cheap coal is in!"

- Low productivity
 - High CFC, low efficiency, high labour cosy
- High production cost
- CO2 penalties probable
- High infrastructure cost (RB not on time)
- Scarcity of water

Scenario 1: "Booming Coal"

- Shortage of coal supply
- Acceptable coal pollution solutions – CCS, CO2
- Electron/electricity economy growing
- Clean energy commercialisation slow

Low Profit Industry

High Profit Industry

Scenarios 3: "Coal not Sexy"

- Alternative energy sources found (shale gas)
- Hydro-Electricity from Moz, Congo
- Stringent environmental legislation
- Economic crises in RSA
- Affordable renewable energy
- Global depression
- Regulatory interference

Scenario 4: "Coal Frustration"

- Over supply in coal industry
 - Old mines close, forced closures
 - Waterberg slow
- Change in mining methods – productivity up (tools, skills methods)
- Declining reserves
- Slow mining rights conversions
- Slow/no investment by mining houses

Low Demand for Coal

SACEA Performance in 2010

Collate, Influence, Share

2010 Industry Review (general)

- Fatalities have been increasing in our industry and we are far from the 2013 targets
 - *2010 – 128 total industry (mining) fatalities*
 - *2010 – coal industry did improve in the year however! From 23 in 2007 to 9 in 2010 – What is differentiation factor? Reportable accidents have however increased for coal mining.*
 - *2011 – already on 21 industry fatalities YTD.*
- Key areas of accidents: fall of ground, vehicles, materials handling
- Proximity detection becoming a huge issue – in USA already promulgated
- Environmental momentum increasing in RSA
 - *License to mine becoming more onerous*
 - *Electricity cost increasing, energy efficiency becoming a big focus, co-generation an opportunity*
- Infrastructure concerns remain – Transnet Freight Rail!
 - *Industry expected to do more and more (by provincial government)*

2010 Industry Review (general)

- Training of 40,000 safety representatives by 2013
- Personal safety performance to become a legacy that travel with you in the industry – industry web database maybe implemented
- Shrinking pool of skills in the industry
 - *Retain skills in industry - skills attracted by associated industry (e.g. risk of legal accountability, onerous, etc)*
 - *Engineering feedstock into industry is however slowly picking up*
 - *Concerns about lack of experience in newly ticketed individuals remain (SACEA needs to give input into the evaluation process)*
 - *More development of artisan skills required*
 - *Poaching of artisans in industry remains (pool not big enough, access to good skills the challenge, quality of training a question)*
- Small mines remain a concern to the industry
 - *Different work approach/culture makes their involvement/participation difficult*

Heads of Engineering Feedback

- Fatal Risk Standards – alignment between mining houses needed
- OEM – alignment with what Mining Houses require for safety (design principles/philosophies, participation in work-teams of EMESRT)
- “When are we seeing Clean Green Coal”?
 - *Engineer for the better*
- Annual feedback/meeting valued
- DMR involvement in 2010 went down well
- “Exam” issue discussed at the 2010 forum and was perceived to be value adding
- Diversity representation required in SACEA
- Technology
 - *Water solutions*
 - *Energy saving initiatives*
 - *Tier 3 engine example*
